5.4 CCB-QMR — Type CCB and QMR power panelboards (legacy; listed under Spectra Series Power renewal parts)

FAM-GEA-006 · panelboard · aka CCB, CDP?, Convertible Circuit Breaker panelboard, NCB, QMR · markings: GE, General Electric, Trumbull

Older GE power panelboards. Breakers mount with copper strap kits suffixed DPK (dual/twin mount) or SPK (single mount) usable on Cu or Al main bus; device product number + suffix ordered as a unit. Replacement CCB fronts CBAxxxxS/F and boxes DASW/DACB; filler plates CCBFPx/QMRFPx. QMR used THFP fusible switches. CDP is named in the batch scope but no CDP-specific data was found.

Evidence record for the existing GE CCB/QMR family: earliest dated GE mention of CCB (1955) and the 1951 Trumbull convertible circuit breaker panelboard description (sectionalized, breakers on steel back plates, removable trip units above 100 A frame). Dealer data shows CCB DPK/SPK strap kits also listed for AV1/AV2 switchboards and QMR.

5.5 CONVERTI-FUSE — Trumbull / GE Converti-Fuse and Swing-Wa fusible distribution panelboards

FAM-GEA-012 · panelboard · aka Converti-Fuse, Safe-Converti-Fuse, Swing-Wa, Swing-WA · markings: Trumbull, General Electric

Trumbull Electric (GE subsidiary) fusible power distribution panelboards. Converti-Fuse: dead-front assembly of phenolic unit sections on a steel back plate whose removable caps hold the fuses and act as pull-out disconnects. Swing-Wa: individually enclosed steel switch units with switching built into the cover. GE bulletin numbers GEC-1253 (Converti-Fuse) and GEC-1255 appear in 1955 trade literature.

5.6 NHB — NAB / NHB bolt-on panelboards (legacy)

FAM-GEA-007 · panelboard · aka ABH, NA, NAB, NHB, NLAB? · markings: General Electric, Trumbull

Legacy GE bolt-on panelboard line. Only distributor evidence found (NHB150PK twin-mount hardware). No OEM document for NHB or NLAB located in this batch.

Evidence record for the existing GE NAB/NHB family. 1951 GE Supply catalog: NAB breakers assembled on a heavy black enamel steel back plate accepting 1, 2 or 3-pole AT breakers; boxes 4-3/4 in deep except 100/225 A main frame which need 5-3/4 in; Type ABH power/lighting panel with AT breakers. NHB appears in the 1955 GE type list; no GE technical description of NHB found yet. ITE/Siemens also used NAB/NHB designations (Canada).

5.7 NLAB — GE / Trumbull NLAB, NLTQ, NLTQX and DB lighting panelboards (TQ / TQL / TQC / TQB breakers)

FAM-GEA-011 · panelboard · aka NLAB, NTQ, NLTQ, NLTQX, DB, TQLA, TQLP, GE NLAB · markings: General Electric, G-E, Trumbull

GE/Trumbull lighting panelboards of the 1950s-1960s. 1951 GE Supply catalog: NLAB 'formerly called NTQ' uses TQ quick-make quick-break thermal-magnetic breakers, 4-42 circuits, standard and column type for mounting in the web of H beams; NLTQ is 'a Trumbull development' with busbars encased in a PLASTISOL interior (said to run 10% cooler) and plug-in TQL breakers; NLTQX is the column type. Fronts are dual-purpose (flush or surface). Finish medium light grey. GE renewal parts list GEG-13610B (Style 5) covers DB, NLTQ and NLAB with bus supports, insulators, lugs, trim clamps, locks and handle-lock devices. Do not confuse with the Westinghouse NLAB (Quicklag breakers).

5.10 SPECTRA-PP — Spectra Series Power Panelboards (Plug-In interior type APN; Bolt-On interior type APNB)

FAM-GEA-004 · panelboard · aka APN, APNB, Spectra, Spectra Bolt-On (SBO), Spectra Plug-In, Spectra Series, SpectraRMS · markings: ABB, GE, GE Industrial Solutions, General Electric

GE's power distribution panelboard. Two interior styles: APN plug-in (breakers bolt to AMC circuit breaker mounting modules that latch onto the interior rail and clip onto the bus; ADS fusible switch modules) and APNB bolt-on (breakers bolt to copper straps AMCB kits fastened with carriage bolts/antiturn clips to the vertical bus). Vertical space measured in X units (1X = 1-3/8 in). Box widths 27/31/36/40/44 in, APB boxes and APF fronts, AML main-lug modules, ANK/ANKN neutral kits, AEG ground kits. NOTE on 'APN': in GE nomenclature APN is the Spectra plug-in interior type code (APNB = bolt-on), while APN48/APN84/APN126 (A-Series) and APN49/APN99 (Spectra) are permanent circuit-number tab kits; no 'A-Series power panel' code APN was found.

Alternate / superseded numbers	AMB2250DCAF [equivalent] (F suffix = kit including cover plates (AFPML))	A	same as above
Description	Spectra Series main lug kit (bolt-on main lug kit), 2-pole, 250 A, D = double lug set per catalog nomenclature; "F" suffix version includes cover plates (pole/amp decoding from catalog-number pattern (AMB<poles><amps>...))	A	same as above
Application	main lugs	A	same as above
Installation location	Line end of APN (lug tangs between buses of each phase) or APNB interior (on 2.75 in reference side); lug wire holes face the LINE end of the box; wire barriers flush with/aligned to side rails or Z rails	A	S294 DEH071 pp.1-2; oem_spec
Poles	2	B	S294 DEH071 p.1; inference
Current rating	250 A	B	same as above
Mounting-hole pattern	Lug strap mounting holes align with the first and third bus holes from the box end stamped LINE, rear row of holes	A	S294 DEH071 p.2 step 3; oem_spec
Torque values	Lug tangs/straps to bus (carriage bolt fed through bus first, flat washer, Belleville washer, nut) 200-250 in-lb; cover screws 25-30 in-lb; conductor torques: Lug part 252B3638G9-10: 375 in-lb, (1) 8-500 kcmil or (1) #2/0-600 kcmil; 252B3638G1-2: 450 in-lb, (4) 2/0-600 kcmil; 252B3638G3-8: 450 in-lb, (8) 2/0-600 kcmil; GEA2-750: 475 in-lb, (2) 3/0-750 kcmil	A	S294 DEH071 pp.1-2 step 4, Table 1; oem_spec

Description	Spectra plug-in lug kit/module, 1200 A, Compression lugs, 4 lug(s) per phase, 1 wire(s) per lug, 500kcmil, includes cover plate AFPML6XW	A	same as above
Application	main lug; convertible to feed-thru with AFL cover plate kit; to dual main with AMK lug kits; mechanical to compression with AMKP	A	same as above
Current rating	1200 A	A	same as above
Dimensions	6X module height; box width 36, 44 in	A	same as above
OEM instruction document	GEH-5588 (Type AML Main Lug Kits); GEH-5630 (AML Feed Thru)	A	S75 p.11-52; oem_spec

Spectra bolt-on breaker strap kit AMCB2FJ (SF/TF, DEH059)

OEM part number	AMCB2FJ	A	S273 p.1; oem_spec
Description	Spectra bolt-on circuit breaker kit for main or single-branch mounting in APNB interiors	A	same as above
Application	main (load/OFF-side terminals on straps) or single branch (line/ON-side terminals on straps)	A	S273 p.2 step 3; oem_spec
Installation location	Spectra APNB bolt-on interior: straps bolt to the vertical bus on the side where nearest vertical bus face to inner face of bus-support rail = 2.75 in; breaker mounting brackets fasten to the panel side rails	A	S273 DEH059 pp.1-2; oem_spec
Breaker compatibility	SFH, SFL, SFP, TF and TH(F) breakers; breaker cover kits AFP3SFS, AFP3SFD, AFP3TFS, AFP3TFD ("TF, and TH" as printed (TFJ/TFK/THFK family))	A	S273 p.1; oem_spec
Poles	2 (configurations per Table 3)	A	S273 p.1; p.2 Table 3; oem_spec
Kit contents	Main/single-branch (Table 1): 1 A pole strap (1); 2 carriage bolt 1/4-20 x 1.50 [or 1/4-20 x 1.00 when single-breaker straps connect to a vertical bus rated 600 A or less] (6); 3 1/4 in Belleville washer (6); 4 1/4-20 nut (6); 5 B pole strap (1); 6 C pole strap (1); 7 breaker mounting bracket (1); 8 breaker mounting bracket (1); 9 thread-forming screw (4); 10 1/4-20 x 3/4 in machine screw (3); 11 1/4 in Belleville washer (3); 12 #10-32 x 3-3/4 in machine screw (2); 13 #10 flat washer (2); 14 #10-32 x 1/2 in machine screw (2); 15 #10 lock washer (2); 16 antiturn clip (6); 17 strap spacer (3)	A	S273 p.1 Table 1; oem_spec
Fasteners	1/4-20 carriage bolts with antiturn clips (clip pin into small hole in strap; bolt in front square hole of vertical bus), 1/4 in Belleville washers and nuts; UL-recognized 105 C thermoplastic tape (OANZ2, Permacel P-30-105 or 3M 66R) on unused strap contact surfaces; overlap > 1/2 each turn; minimum 0.028 in = two complete layers of overlapping turns	A	S273 pp.1-2; oem_spec
Torque values	Single/main: cover support to bracket #10-32 x 1/2 in screws with lock washers 18 in-lb; opposite bracket thread-forming screws 30 in-lb; breaker to bracket #10-32 x 3-3/4 in screws with flat washers 30 in-lb; terminal to strap 1/4-20 x 3/4 in screws with Belleville washers 50 in-lb; strap-to-vertical-bus 65 in-lb	A	S273 p.2 steps 2-4; oem_spec
OEM instruction document	DEH059 R02 (09/2001) Installation Instructions; replacement hardware kit AHKBF1	A	S273 p.1, p.6; oem_spec
Identification features	Main/single-branch kit includes 3 strap spacers used for left-hand cable connection (strap and spacer square holes aligned; carriage bolt passes through both)	A	S273 p.1 step 1a/1b; oem_spec

Spectra plug-in single-breaker mounting hardware AHKLB1

OEM part number	AHKLB1	A	S75 p.11-44; oem_spec
Description	Mounting hardware, single breaker, plug-in Spectra: screws and washers to mount one circuit breaker on an AMC module; included when ordering AMC module, only required when mounting breaker on existing module	A	same as above
	Spectra plug-in module circuit breaker mounting hardware kit (line- and load-end mounting screws)	A	S278 p.1; oem_spec
Installation location	Plug-in AMC breaker module: breaker ON side placed over stud posts and resting on the load-end mounting bracket; on J-frame the line mounting screws are replaced by 5/16-18 nut-washer assemblies	A	same as above
Breaker compatibility	For AMC modules: AMC3LB, AMC6LB (Column alignment in PDF text extraction; mapping of module rows to AHK numbers should be checked against the original page layout)	A	S75 p.11-44; oem_spec
	LB (SKP-type) frame (frame inferred from kit letter and Spectra module nomenclature; GEH5913 lists only catalog numbers)	C	S278 p.1; inference
Fasteners	Line-end mounting screw 1/4-20 x 1 in socket head (torque cell not legible/merged); load-end mounting screw #10-32 x 2-3/4 in pan head (torque cell not legible/merged) (Text rendering runs table columns together; screw/torque pairing for cells shown as merged is not certain)	A	S278 p.1 Table 1; oem_spec
Torque values	Line-end mounting screw 1/4-20 x 1 in socket head (torque cell not legible/merged); load-end mounting screw #10-32 x 2-3/4 in pan head (torque cell not legible/merged) (column alignment reconstructed from text rendering)	B	same as above

5.11 TRUMBULL — Trumbull Electric (Plainville CT) panelboards and switches

FAM-GEA-010 · panelboard · aka Trumbell (misspelling), GE-Trumbull · markings: Trumbull, Trumbull Electric Mfg. Co., A General Electric Organization

Trumbull Electric was GE's panelboard/switch maker before GE-branded distribution products; later Trumbull panels accept GE breakers per labels. Coded GEA per lineage. No Trumbull hardware part numbers were found.

Attribute	Value	Cl.	Sources
Status	Obsolete; forum states GE and Trumbull breakers share part numbers (e.g., TQL/THQL)	D	S158 forum
Era of manufacture	Trumbull Electric Mfg. Co., Plainville CT, labelled 'A General Electric Organization'; split-bus panels into early 1960s	C	same as above
Successor	General Electric (GE Industrial -> ABB 2018)	C	same as above
Branch breakers accepted	GE-type plug-in (TQL/THQL family) in later panels; ATB-type breakers reported in older Trumbull switchboards (not in SKM library)	D	same as above

6.1 MURRAY — Murray / Crouse-Hinds panelboards and loadcenters (pre-Siemens)

FAM-SIE-012 · loadcenter · aka Murray MP, MP-HT, Crouse-Hinds MP · markings: Murray, Crouse-Hinds, Siemens Murray

Murray (and Crouse-Hinds-branded) panels are primarily residential/light-commercial loadcenters; lineage passed to Siemens (code SIE). Commercial three-phase Murray panelboards were not found in this batch; surplus listings show only loadcenter mains (MEQ9985, MEQ9683R, MD200-H) and a motor-control ground bar LX074M.

FAM-SIE-007 · panelboard · aka F1, FPP (10in), S4, SPP, Sentron SPP shallow · markings: Siemens

Siemens 10in-deep distribution (power) panelboard. Branch circuit breakers mount in unit space on 'Connecting Strap Kits' (S* series, e.g. SBL, SE6, SQR, SF6, SJ1, SL6) supplied without breaker; fusible branches use F6xx kits. Same strap kit family serves Type S4 and Sentron SPP shallow panels.

6.9 PUSHMATIC — Bulldog / ITE Pushmatic panelboards and Electri-Centers (incl. 3-phase versions)

FAM-SIE-011 · panelboard · aka Pushmatic, Bulldog Pushmatic, Electri-Center, Electra-Center · markings: Bulldog, Bull Dog, Pushmatic, ITE Pushmatic, Gould ITE, Siemens, Electri-Center

Bulldog Pushmatic panels use push-button (not toggle) bolt-on breakers, grease-lubricated mechanisms reported to stiffen if not exercised, thermal plus (in at least some versions) magnetic trip. Brand passed to ITE/Gould and then Siemens. Replacement 1-2 pole breakers exist (Connecticut Electric UBIP); 3-phase Pushmatic panelboards exist but replacement 3-pole breakers are scarce. Condensed-space P1515 dual breakers do not fit older ITE Pushmatic panels.

Revised P1 250A OEM chassis, 18 circuit, Cu 1-ph bus

OEM part number	K-11-D-2550-01	A	S334 pp. 2-3; oem_spec
Description	Revised P1 OEM chassis (bus interior) 18 circuit Cu 1-ph; neutrals NOT provided; deadfront by customer; will NOT directly replace Original P1 chassis	A	same as above
Voltage rating	240 V max with BL/HBL/BLH/BLE/BLF branches; 480Y/277 V max with BQD branches	A	same as above
Current rating	Tested to 250 A in minimum enclosure 20 in W x 5.75 in D x 26 in H, Cu or Al bus	A	same as above
Dimensions	Chassis length L = 9 in (18 ckt); dimension A 5 in; 12.63 in typical at main and subfeed ends; 1.57 in between panel bus and base; 4.37 in to back of deadfront; breaker cut-outs 2.156 / 2.313 in	A	same as above
OEM instruction document	Siemens instruction sheet 11-A-1117-01 Rev. 01: 250A OEM Chassis Instructions (Revised P1)	A	same as above
Interrupting ratings	200 kA max or lowest rated device; 22 kA if interior has subfeed/feed-through lugs and no protective device	A	S334 pp. 2-3; oem_spec

Legacy distribution panelboard and switchboard lines served by the Series 6 connecting strap kits (6E62, 6F62, 6JJ62, 6LL61...) and 6FPB blank plates. 2005 Siemens price list states these kits fit 'switchboards manufactured since 1974'. Equipment lineage (ITE/Gould-ITE/Siemens-Allis) for each type not confirmed in OEM documents in this batch.

Evidence record for existing CDP6 family: dealer kits 5EH2 (EE/EH/EF/HE twin), 5FJ2 (FJ3 twin) and 5JJ2 (JD3/JJ3/JL3/HJ3 twin) list panel type 'FC20 VB'; CDPFJ3, 6CLJ6 and NEB65K list 'FC1, FCII, SB1-3, CDP-5, CDP-6, S5, P5'. The 1990 NEC committee roster shows 'I-T-E Elec. Prod. Div. of Siemens-Allis Inc.'

7.1 BDP — FPE BDP distribution panelboard (double-hole bus)

FAM-FPE-002 · panelboard · aka BDP panel board, BDP Spectra bolt-on (as listed by Superbreakers - likely erroneous) · markings: Federal Pacific, FPE

FPE BDP is a distribution panelboard with a 'double hole bus' (Superbreakers) using twin bus-connection kits KBDP1C-KBDP5C per breaker frame. Breaker King sells PCS aftermarket assemblies NEF3K/NEJ3K/NJL3K replacing KBDP1C/KBDP2C/KBDP4C. Superbreakers labels KBDP1C as 240 V 100 A for 'BDP Spectra Bolt-on' panelboards - the 'Spectra' wording appears to be a listing error (Spectra is a GE name).

7.2 CDP — FPE CDP distribution panelboard (single-hole bus)

FAM-FPE-001 · panelboard · aka CDP panel board, CDP panelboard, NHDP · markings: American (ACBC), FPE, Federal Pacific

FPE CDP is a commercial/industrial distribution panelboard using a 'single hole bus' (per Superbreakers description) onto which pairs of N-frame bolt-on molded-case breakers are mounted with OEM bus connection ('link') kits KCDP1C through KCDP5C, one kit per breaker frame family. Each kit (per Breaker King) includes screws, brackets and a deadfront cover plate and mounts two breakers (twin). Aftermarket equivalents NEF1K, NEJ1K, NFJ1K, NJL1K are cross-referenced to the OEM kits. NN-frame switches (e.g., NN633120NA) are also described as fitting CDP panelboards.

Evidence record: 1962 FPE advertisement - NHDP and CDP distribution panelboards with individually lockable rotary-handle breakers 15-800 A, all-steel front panel, individually grounded cover plates.

7.3 FDP — FPE FDP fusible distribution panelboard / QMQB switchboard

FAM-FPE-003 · panelboard · aka QMQB panelboard, QMQB switchboard, Federal Pacific QMQB · markings: Federal Pacific, American

FDP is FPE's fusible distribution panelboard family built around QMQB bolt-on fusible switch units ('used for QMQB and FDP style panel boards and switchgear distribution systems'). Switch units connect to the vertical bus through KFDP-series link/strap kits (KFDP2C, 3C, 4C (200 A), 46C (400 A), 66C (600 A), 7C (1200 A), plus D/S/V variants KFDPD16C, KFDPS16C, KFDPD26C, KFDPS26C, KFDPV7C) and KQB-series kits (KQB3C 15-100 A, KQB4C, KQB46C, KQB66C, KQB86C 700-800 A).

7.4 NA1B — FPE NA1B / NH1B lighting and appliance panelboards

FAM-FPE-005 · panelboard · aka NAIB, NH1B, NHIB, NA-type panel, NH-type panel, NAB, NHB · markings: Federal Pacific, Federal Noark, Stab-Lok

NA1B ('NAIB') and NH1B ('NHIB') are FPE lighting/appliance panelboard types. A used kit KCDP-1A is labelled 'For NE/NEF frame circuit breakers, for NH1B/NA1B type panels, for (2) 3 pole breakers'. relectric lists NAIB-NEF 'NE/NEF twin kit for NA1B panel' and Superbreakers lists KNA1B1C lug kit. fpeparts.com lists 'NAIB panel board kit' and 'NHIB panel board kit'. By analogy with FPE breaker naming (NA=Stab-Lok 120/240 plug-in; NE/NEF=bolt-on 240/480 V) NA1B is likely the 120/240 or 208Y/120 panel and NH1B the 480Y/277 panel, but this is unverified.

7.5 NBLP — FPE NBLP / NQLP bolt-on lighting panelboards

FAM-FPE-006 · panelboard · aka NQLP, NB panelboard · markings: Federal Pacific, Federal Pioneer (Canada)

NBLP panelboards take NB-type bolt-on Stab-Lok-style breakers (Schneider FAQ snippet; Superbreakers NB100 'installs into Federal Pacific NB and NBLP panelboards'). NQ breakers are described as fitting NBLP and NQLP panelboards. Federal Pioneer (Canadian FPE subsidiary, sold to Schneider Canada in 1988) used the same Stab-Lok NB/NBLP nomenclature; that lineage is coded SQD in this catalogue.

7.7 FPE-SWBD — FPE switchboards (N-frame bolt-on / NM-NN-NP / Fusematic)

FAM-FPE-007 · switchboard · aka Federal Pacific switchgear, Fusematic, HCB, VCB · markings: American, FPE, Federal Pacific

FPE switchboards used N-frame bolt-on breakers (NJL 'designed for direct installation into legacy Federal Pacific switchboards and panelboards that accept N-frame bolt-on breakers'), larger NM (400-800 A with trip units NM031400/500/600/800, lugs NM34/NM36/NM38) and NP frames (to 1600 A), and the Fusematic line (XF breakers, XJL current limiters). Group-mounting hardware for switchboards not identified beyond the panelboard KCDP/KBDP kits.

Evidence record: 1962 FPE advertisement - 600 V AC switchboards types HCB (main distributor sections through 2000 A, small buildings) and VCB (through 6000 A, medium-to-large buildings); branch rotary-handle breakers through 800 A.

FAM-ZIN-002 · panelboard · aka QSF panelboard, Sylvania S-line panelboard, double slot, single slot split buss · markings: Zinsco, Sylvania, GTE Sylvania

Zinsco/Sylvania commercial distribution panelboards used two bus/kit styles: 'Double Slot' (Zinsco kits QSF100DS-QSF600DS and DSL* breaker kits) and 'Single Slot ... Split Buss' (Sylvania QSF100SB/200SB/400SB). DSL kits exist for FPE frames (DSLNET, DSLNEJT, DSLNFT, DSLNJT, DSLNM) supporting a forum report that FPE breakers were used in Zinsco/Sylvania equipment above 240 V; Sylvania also lists FPENEFT 'twin mounting hardware for NEF breaker'. Sylvania-branded SEH/SF/SJK bolt-on breakers are sold as fitting Sylvania, Challenger and Zinsco panelboards.

8.2 ZIN-Q — Zinsco / Sylvania Q-type plug-in panels and lighting panelboards (Magnatrip)

FAM-ZIN-001 · panelboard · aka Magnatrip, ML12, MLB20, MOB20, MTMB20, MT12MBB, Q-frame · markings: Zinsco, Magnatrip, Sylvania, GTE-Sylvania, GTE Sylvania Zinsco, Challenger (Zinsco-frame), Kearney (look-alike)

Zinsco (and Sylvania-labelled) panels use breakers with deep slots that clip onto flat on-edge bus bars; plug-in Q/QC/R38 branch breakers and QFP/QFL/QFB main breakers. Commercial versions with 3-phase 240 V and bolt-on QB/QCB breakers exist (QB243040 'for obsolete Zinsco commercial and industrial panelboards'). Known failure mode: loosened breaker-bus contact on aluminium bus causing arcing/fusing. Aftermarket: Connecticut Electric UBIZ breakers (10 kAIC) and UBIZRBK12 125 A replacement bus kit.

9.2 FA — Frank Adam Electric panelboards

FAM-OTH-001 · panelboard · aka Frank Adams, FAM, PULFUZSW, KLAMPSWFUZ · markings: Frank Adam, Frank Adam Electric Co., FA

Frank Adam Electric Co. (St. Louis) made panelboards, fused switches and breakers from c.1900; its west-coast branch became Zinsco. Labels include PULFUZSW and KLAMPSWFUZ fused main panels and Fuselok switches. InspectAPedia reports some Frank Adam panelboards used Zinsco-type QSF units. A surplus 'FAM CU-NFJ hardware kit' suggests late Frank Adam panelboards accepted FPE NFJ breakers (unverified).

Open research leads (priority 1–2)

Lead	Pri.	Topic / detail
LEAD-0001	1	**Eaton instruction leaflets for KB/KL/KPRL3/KPRL4 kits** — Renewal-parts guides give catalog numbers and compatibility but no kit drawings, torque values, strap dimensions or hole patterns. Each kit ships with instructions (IL/IB numbers not cited in the guides). Search Eaton document library for IL numbers packed with KPRL4X32, KPRL3AFD3, KB13AFT, KL23AMS, PRLSEBFD.
LEAD-0002	1	**Supersession mapping 2017 -> 2021 (PRL4 KPRL4FD/FD1/FD2/ED/ED2/LD; PRL1a/2a deadfronts 4180B03/4180B61/4180B05; PRL3a covers 4176B68/4180B93/4178B08/4179B39-42; filler 4178B06H01)** — April 2021 edition replaced these numbers with KPRL4X12/X22/X32/LC and 42C80xx covers (same table rows). Distributor text says 4178B06H01 is for panels built before April 2019 and 42C8083H01 after - implies a chassis change, so old and new are probably NOT interchangeable. Confirm with Eaton Sumter aftermarket (803-481-6677) or a December 2020 edition of RP01400001E. Docs: RP01400001E

Lead	Pri.	Topic / detail
LEAD-0014	1	**Pow-R-Line C switchboard branch provision / connector kit catalog numbers** — Vol 12 p. V12-T15-5 says provisions/connectors are available for all PRLC ratings, but no catalog numbers are public. Obtain the PRLC distribution chassis renewal-parts/price list (Sumter) or a PRLC field-installation IL for adding group-mounted FD/JD/KD/LD/MDL/ND devices; confirm whether KPRL4/KPRL4X kits are the same parts. Docs: IM01500001E, CA08100003E Tab 4
LEAD-0015	1	**WF/WRP switchboard distribution-section connector and retrofit kits** — RP01400002E p.20 lists 'Retrofit kits for WF and WRP distribution sections' and 'Connector kits for WF and WRP distribution sections' from Sumter but gives no numbers. Check whether KCDP/KFDP kits are used, since WF/WRP feeders were CDP-type breakers and FDP switches. Docs: RP01400002E, PL01400002E
LEAD-0025	1	**2700CT1601 OEM QED-2 I-Line interiors catalog** — Contains single/double-row OEM interior selection tables (CF... numbers), likely end closures, splice/main lug kits. Blocked by Akamai (productinfo.se.com, download.se.com 403). Try a distributor mirror (media.distributordatasolutions.com), Rexel/Graybar spec-sheet links, or a browser session. Docs: 2700CT1601
LEAD-0026	1	**QED-2 instruction bulletin 80043-055-16 (2024) and -13 (2018)** — Handling, assembly, splice (through-bus) and torque data for QED-2; likely gives splice plate hardware and torque values. Blocked. Docs: 80043-055-16, 80043-055-13
LEAD-0027	1	**OEM interiors IB 80235-597-09** — Schneider FAQ cites IB 80235-597-09 for single/double-row OEM I-Line interiors. Docs: 80235-597-09
LEAD-0038	1	**Current ABB BuyLog Section 11 (2021/2022) - ReliaGear neXT kit numbers and Spectra retrofit kits** — Contains ReliaGear neXT catalog nomenclature, single breaker-installation-kit catalog number, 'Retrofit kit for Spectra panelboards' and 'Spectra (obsoleted) bolt-on mounting hardware'. Host electrification.us.abb.com returns 503/empty reply from this container; try another network or distributor mirror. Docs: BuyLog Section 11 (ABB)
LEAD-0039	1	**Spectra bolt-on strap instruction leaflets DEH-047, DEH-059, DEH-060, DEH-061, DEH-062 and DEH042 cover supports** — Would give strap part numbers, kit contents and torques for AMCB EB/SE, SF, SG, SK/KM and EY kits, plus cover-support catalog numbers by panel width. Copies exist on manualmachine.com (HTTP 403 here) - e.g. DEH061 AMCB3KM/AMCB2KM, DEH042 SE/SF/TE/TF/TQ/TEL cover supports, AMCB4GB/AMCB6GB, AMCB2GM/AMCB3GM. LEAD-0070	1	**FPE OEM panelboard catalog / renewal parts list** — Find original Federal Pacific (or American Circuit Breaker / Federal Pacific Equipment) panelboard catalog giving CDP/BDP/NDP/FDP/NA1B/NH1B/NBLP definitions and the KCDP/KBDP/KFDP/KQB kit tables with breaker compatibility, dimensions and bus details. Circuit Breaker Sales (Matthews NC, 704-882-1875) holds FPE technical documents per fpeparts.com.
LEAD-0071	1	**Confirm KBDP3C frame and KCDP5C/KBDP5C ratings** — Numbering pattern (1=NE/NEF, 2=NEJ, 3=NFJ, 4=NJL, 5=NM) is inferred; Superbreakers gives 225 A for KCDP5C (NM/NN) which looks wrong.
LEAD-0074	1	**Eaton CH/BR retrofit kits current status** — Verify whether RACH*/RBCH*/RCCH*/RDCH*/RABR*/RBBR*/RCBR*/RDBR*/REBR*/RAABR* kit numbers are still orderable (Lincoln Flex Center 800-330-6479) and find the original Eaton publication number/date; look for 480Y/277 V retrofit (PRL-based) offerings and Square D/Siemens equivalents.
LEAD-0084	1	**NQOD / NEHB legacy kit part numbers** — No OEM table of NQOD main breaker kits (bulletin 80043-699-03 covers a 250 A NQOD main kit but prints no catalog number), NQOD neutral/lug kits or NEHB kits found. Search Supplemental and Obsolescence Digest (Digest Plus 'Supplemental and Obsolescence Digest') and older Digest 170-175 PDFs for NQOD/NEHB accessory tables. Docs: 80043-699-03, 80043-687-03
LEAD-0085	1	**SKNQOD225 finger part numbers for reproduction** — OEM FAQ FA124209 gives component numbers 80110-005-01 (A/C finger), 80110-006-01 (B finger), 80025-068-01 (screw). Obtain drawings/dimensions; check whether a 400 A NQOD connector kit existed.

LEAD-0042	2	**Main lug kit instructions GEH-5588 / GEH-5630 and AMB-numbered main lug kits (p.11-28)** — BuyLog p.11-28 lists a second main-lug numbering (AMB3600MAF, AMB3120MAF, AMB3120DMAF, AMB3250CAF, AMB3600CAF, AMB3800CAF, AMB3120CAF, AMB3120NF, cover plates AFPML4X/6X/6XW) apparently for factory-installed/merchandise panels; relationship to AML modules (p.11-45) unresolved. Not yet catalogued as parts. Docs: GEH-5588, GEH-5630
LEAD-0043	2	**Spectra ANK neutral kit full table (p.11-27) and ADS switch load bases 331A1519Gxx / 331A1545Gx / 331A1543G1** — About 70 ANK/ANKT neutral kit numbers by box width/main config and ~30 ADS load base renewal numbers are in the BuyLog but were not individually catalogued in this batch. Docs: BuyLog p.11-27, BuyLog p.11-44
LEAD-0049	2	**Installation instructions for P1/P2/P3/P4/P5 strap kits** — SpeedFax references Installation Instructions for S3VA41T(D) accommodating xGB/xGB2, and drawing refs (11-D-2267-01 BBKB32, 11-D-2894-01 BBKVA5262P2S, 11-A-2010-01 P1SCRWS, etc.). Siemens SIOS (support.industry.siemens.com) likely hosts these as PDFs; search by kit number. Needed for torque, fastener and dimension data (currently unknown for nearly all parts). Docs: 11-D-2267-01, 11-D-2894-01, 11-D-2895-61, 13-D-2011-13, 11-D-2572-02, 11-D-2573-01, 11-D-2573-02

LEAD-0050	2	**Original P1 / S1 / S2 branch connector replacement parts** — 2021 SpeedFax lists only Revised P1 branch connectors (P1CONACPHCU, P1CONBPHAL, P1CONBPHCU). Whether these fit original P1 or S1/S2 interiors is not stated (table column marks Revised P1 only). Older SpeedFax editions (2010-2014) should be checked for original P1 connector kits.
LEAD-0051	2	**Revised P1 main breaker kits with breaker (MBK...A with amp rating)** — SpeedFax p.11-14 lists ~47 factory kits with breaker included (MBKED3100A, MBKQR1125A..MBKQR3225HA, MBKVAM3150A..MBKVAH3400A, MBKFD3150A..MBKFD3250A, MBKJD1300A..MBKJD32400A). These are referenced in 'replacement' notes on strap-kit records but not catalogued individually in this batch. Canadian equivalents (MBKQR12225A, MBKFD33250A, MBKJD33400A, MBKHF33250A, MBKED33100A) in SI-LP-1633. Docs: SPEEDFAX p.11-14, SI-LP-1633
LEAD-0058	2	**Square D KA/KH lug kit supersession and FY/E-frame/QB-QD-QG-QJ lugs** — 2012 Digest lists AL250KA only against KI; KA/KH lists need older Digest (e.g., Digest 172/173) or instruction bulletins. No E-frame (EDB/EGB/EJB) or Q2/QB lug kits located; 2012 Digest notes threaded insert kit for EDB/EGB/EJB/FJA (table text partly garbled). Docs: Digest 172, Digest 173
LEAD-0059	2	**Square D lug-kit instruction bulletins** — 48940-221-02 (H/J lug kits) and AL100FA4 instructions exist; download blocked (se.com 403). Would give torque values and kit contents. Docs: 48940-221-02
LEAD-0060	2	**Current 0611CT1001 v5.0 (2024) PowerPact H/J/L catalog** — Verify whether 2013 lug tables (esp. column-scrambled CU L-frame rows in Table 121) changed; check PDC3JD20 vs PDC3JD2. Docs: 0611CT1001
LEAD-0063	2	**GE TCAL28 / TCAL38 / TCAL39 / TCAL51 / TCAL62 not found** — These numbers appear in the batch scope but are not in the GE BuyLog 2008 excerpt or the 2012, 2013 or 2019 lug tables. TCAL28 may be confused with TCAL28PD1/PD3 (SF power distribution lugs). Older GE lug numbers (TCAL2x/3x for the 1980s-90s TF/TJ lines) may appear in GEP-1100 / GET-xxxx renewal catalogs or older BuyLog editions (pre-2008). Docs: GEP-1100
LEAD-0064	2	**GE footnote digits fused into part numbers** — The pdftotext extraction of GE BuyLog runs footnote superscripts into part numbers (TCAL1212 = TCAL121 + fn2, TCAL811 = TCAL81 + fn1, TCLK3652 = TCLK365 + fn2, SKLVK6 = SKLVK + fn6, etc.). Base numbers were reconciled across the 2012 and 2019 editions (different footnote numbering). TCAL122, TCALK2122/3122, TCAL91, TCALK291/391, TCAL131 and 789A448G3 are inferred bases (conf B/C). Check them against distributor or ABB product pages. Docs: BuyLog Section 6 Rev 1/19, BuyLog Section 3 Rev 9/12
LEAD-0065	2	**Siemens QJ2 / pre-Sentron ITE lug kits** — SPEEDFAX 2017/2021 no longer lists QJ2, so the only QJ2 lug found is TA1Q300 (distributor). Old ITE numbers such as TA1D/3TA1D/TA1E/TA1F/TA1G/TA2DS/TA3J6500/TA2P400 were not found in the 2017 tables. Search older SPEEDFAX editions (e.g. SPEEDFAX 2004-2011, Section 7) and ITE 'Breaker Lug Selection' leaflets. Docs: SPEEDFAX 2011 Section 7
LEAD-0072	2	**Breaker King / PCS aftermarket FPE kits** — PCS (manufacturer of NEF1K/NEJ1K/NFJ1K/NJL1K/NEF3K/NEJ3K/NJL3K/NFJ3K) - identify company (Power Circuit Specialists?), obtain installation instructions and confirm listing status.

LEAD-0075	2	**Square D / Siemens retrofit interiors for FPE and Zinsco** — Forum posts say Square D (NQ/NF) and Eaton build custom interiors to fit existing enclosures; find Schneider 'retrofit panelboard' or 'replacement interior' literature and any listed-for-enclosure marking practice.
LEAD-0076	2	**Schneider/Federal Pioneer FAQs on FPE replacement breakers** — se.com FAQ000278110 and FA234570 blocked (403). Retrieve via browser to capture exact wording on NBLP/NB and CDP.
LEAD-0077	2	**Zinsco/Sylvania commercial panelboard catalogue** — Need GTE-Sylvania/Zinsco catalogue for QSF and double-slot/single-slot split-bus distribution panelboards, DSL* kit numbering (are DSL*/QSF*DS/SB OEM numbers or relectric dealer numbers?), and Sylvania SE/SEH/SC/SJD/SKM kit compatibility.
LEAD-0078	2	**Challenger PM4a/PM4b panelboard documentation** — Identify Challenger panelboard types (PM4a, PM4b) and the breaker frames for C?D?K kits; check whether Eaton KPRL4C*/KPRL4AC*/KPRL4BC* kits are Eaton OEM conversion kits for Challenger breakers in PRL4. Possibly overlaps Eaton batches (B0001/B0002).
LEAD-0086	2	**NQ/NF branch connector part numbers inside SKNQBC/SKNF250/SKNF600** — Bulletins 80043-735-01 and 80043-767-01 give contents but not component part numbers or dimensions. SKNF250 torque text is internally inconsistent (30-40 lb-in vs 6.74-8.99 N-m). Docs: 80043-735-01, 80043-767-01
LEAD-0087	2	**Bulletin number scan gaps** — download.schneider-electric.com accepts p_Doc_Ref=<doc number> (browser UA); HEAD scan found 80043-6xx..8xx bulletins, but rate-limiting (403) means some numbers were missed. 80043-0xx..5xx was scanned single-pass (only 9 hits) - rescan slowly with suffixes -01..-06. LEAD-0110	2	**I-Line HCM/HCR-U neutral bonding straps 80043-446-06, 80121-082-02, 80010-600-01, hardware kit BBV57291** — Seen only in search-result summaries of se.com FAQs FA225933/FA117902/FA339459 (403 on fetch). Would add neutral bonding strap part numbers for HCR-U with/without neutral CT. Docs: 80043-446-06, 80121-082-02, 80010-600-01, BBV57291
LEAD-0111	2	**Current ABB BuyLog Section 11 Panelboards (2021/2022, ReliaGear neXT, "Spectra (obsoleted) bolt-on panelboard mounting hardware" p.11-63)** — electrification.us.abb.com PDF: curl HTTP/2 INTERNAL_ERROR / empty reply, WebFetch 503. pdf4pro.com has a text preview (TOC confirms p.11-63 Spectra obsoleted bolt-on hardware) but download is 403. ABB quick-selector guide (simplebooklet) gives the retrofit-kit table; product-number columns of its Spectra renewal tables are images.
LEAD-0112	2	**Tmax XT Spectra retrofit kit (SRFB/SRFN) installation instructions** — No instruction document number found; empower lists SRFB kits only inside breaker cross-reference entries (e.g. Tmax27292). Need kit contents, strap part numbers and torques.
LEAD-0116	2	**Eaton KB/KL/KCDP/KFDP/1C96608 kit instruction leaflets not public** — No Eaton instruction leaflet or SKU page exists online for KB* vertical main breaker kits, KL* lug kits, KCDP*, KFDP* or 1C96608/2C11642/1C96609 branch assemblies (skuPage 404 on Eaton mirror). Kit ILs ship in the box: obtain physical kits or Eaton satellite-plant copies to capture strap dimensions/torques.
LEAD-0117	2	**Eaton SPX0361126 project O&M manual (585 pp) on ManualsLib** — ManualsLib manual 1538842 'Eaton Pow-R-Line SPX0361126' compiles IM01500001E (2011), Pow-R-Line panelboard renewal parts (Feb 2009) and switchboard unit data incl. 'Circuit Breaker Mounting Bolt Drilling Plan' (p.413) and 'Branch Devices' (p.363). Curl/manualzz blocked (403); WebFetch works page by page. Docs: SPX0361126
LEAD-0121	2	**Siemens US SPEEDFAX Section 12 switchboard branch kit table** — Locate SPEEDFAX (2017-2021) Section 12 switchboard 'distribution section branch mounting kits' page (SB1/SB2/SB3, CDP6/FC) for US catalog numbers and breaker compatibility; distributordatasolutions 2021q3/q4 documents host Section 11 - try sibling document hashes for Section 12.
LEAD-0122	2	**Eaton cooperindustries.com mirror** — cooperindustries.com mirrors eaton.com DAM and skuPage URLs (www.eaton.com times out from container). Use it for Eaton switchboard ILs (e.g. Pow-R-Line C/i branch device instructions, IL 29C101H breaker leaflets) and for current RP01400001E.

The complete backlog is maintained in research/BACKLOG.md.
