Open research leads (priority 1–2)

Lead	Pri.	Topic / detail
LEAD-0001	1	**Eaton instruction leaflets for KB/KL/KPRL3/KPRL4 kits** — Renewal-parts guides give catalog numbers and compatibility but no kit drawings, torque values, strap dimensions or hole patterns. Each kit ships with instructions (IL/IB numbers not cited in the guides). Search Eaton document library for IL numbers packed with KPRL4X32, KPRL3AFD3, KB13AFT, KL23AMS, PRLSEBFD.
LEAD-0002	1	**Supersession mapping 2017 -> 2021 (PRL4 KPRL4FD/FD1/FD2/ED/ED2/LD; PRL1a/2a deadfronts 4180B03/4180B61/4180B05; PRL3a covers 4176B68/4180B93/4178B08/4179B39-42; filler 4178B06H01)** — April 2021 edition replaced these numbers with KPRL4X12/X22/X32/LC and 42C80xx covers (same table rows). Distributor text says 4178B06H01 is for panels built before April 2019 and 42C8083H01 after - implies a chassis change, so old and new are probably NOT interchangeable. Confirm with Eaton Sumter aftermarket (803-481-6677) or a December 2020 edition of RP01400001E. Docs: RP01400001E
LEAD-0014	1	**Pow-R-Line C switchboard branch provision / connector kit catalog numbers** — Vol 12 p. V12-T15-5 says provisions/connectors are available for all PRLC ratings, but no catalog numbers are public. Obtain the PRLC distribution chassis renewal-parts/price list (Sumter) or a PRLC field-installation IL for adding group-mounted FD/JD/KD/LD/MDL/ND devices; confirm whether KPRL4/KPRL4X kits are the same parts. Docs: IM01500001E, CA08100003E Tab 4
LEAD-0015	1	**WF/WRP switchboard distribution-section connector and retrofit kits** — RP01400002E p.20 lists 'Retrofit kits for WF and WRP distribution sections' and 'Connector kits for WF and WRP distribution sections' from Sumter but gives no numbers. Check whether KCDP/KFDP kits are used, since WF/WRP feeders were CDP-type breakers and FDP switches. Docs: RP01400002E, PL01400002E
LEAD-0025	1	**NQOD / NEHB legacy kit part numbers** — No OEM table of NQOD main breaker kits (bulletin 80043-699-03 covers a 250 A NQOD main kit but prints no catalog number), NQOD neutral/lug kits or NEHB kits found. Search Supplemental and Obsolescence Digest (Digest Plus 'Supplemental and Obsolescence Digest') and older Digest 170-175 PDFs for NQOD/NEHB accessory tables. Docs: 80043-699-03, 80043-687-03
LEAD-0026	1	**SKNQOD225 finger part numbers for reproduction** — OEM FAQ FA124209 gives component numbers 80110-005-01 (A/C finger), 80110-006-01 (B finger), 80025-068-01 (screw). Obtain drawings/dimensions; check whether a 400 A NQOD connector kit existed.
LEAD-0036	1	**2700CT1601 OEM QED-2 I-Line interiors catalog** — Contains single/double-row OEM interior selection tables (CF... numbers), likely end closures, splice/main lug kits. Blocked by Akamai (productinfo.se.com, download.se.com 403). Try a distributor mirror (media.distributordatasolutions.com), Rexel/Graybar spec-sheet links, or a browser session. Docs: 2700CT1601
LEAD-0037	1	**QED-2 instruction bulletin 80043-055-16 (2024) and -13 (2018)** — Handling, assembly, splice (through-bus) and torque data for QED-2; likely gives splice plate hardware and torque values. Blocked. Docs: 80043-055-16, 80043-055-13

Lead	Pri.	Topic / detail
LEAD-0038	1	**OEM interiors IB 80235-597-09** — Schneider FAQ cites IB 80235-597-09 for single/double-row OEM I-Line interiors. Docs: 80235-597-09
LEAD-0049	1	**Current ABB BuyLog Section 11 (2021/2022) - ReliaGear neXT kit numbers and Spectra retrofit kits** — Contains ReliaGear neXT catalog nomenclature, single breaker-installation-kit catalog number, 'Retrofit kit for Spectra panelboards' and 'Spectra (obsoleted) bolt-on mounting hardware'. Host electrification.us.abb.com returns 503/empty reply from this container; try another network or distributor mirror. Docs: BuyLog Section 11 (ABB)
LEAD-0050	1	**Spectra bolt-on strap instruction leaflets DEH-047, DEH-059, DEH-060, DEH-061, DEH-062 and DEH042 cover supports** — Would give strap part numbers, kit contents and torques for AMCB EB/SE, SF, SG, SK/KM and EY kits, plus cover-support catalog numbers by panel width. Copies exist on manualmachine.com (HTTP 403 here) - e.g. DEH061 AMCB3KM/AMCB2KM, DEH042 SE/SF/TE/TF/TQ/TEL cover supports, AMCB4GB/AMCB6GB, AMCB2GM/AMCB3GM. Docs: DEH-047, DEH-059, DEH-060, DEH-061, DEH-062, DEH042
LEAD-0058	1	**Legacy ITE / Gould-ITE lighting panelboard renewal parts (pre-Siemens S1/S2)** — No OEM ITE, ITE Imperial or Gould-ITE panelboard renewal-parts catalogue was found online. Type designations in the scope (ITE NQB/NLAB/NHB, EQ panelboards, 'CDP' early series) were NOT confirmed in any document reached. Need scanned ITE 'Distribution Products' catalogues (1960s-1980s) or Siemens-Allis price lists; try archive.org, worldradiohistory, eBay catalogue scans, and Siemens legacy support (1-800-333-7421).
LEAD-0059	1	**SpeedFax Section 12 (Switchboards) page 12-32 branch device mounting kits** — SpeedFax Sec.11 p.11-15 says: 'For Series 5, Series 6, CDP6 and VB6 panels as well as FC20, FCI, FCII, SB1, SB2 and SB3 distribution switchboards, see page 12-32 for branch device mounting kits.' US Section 12 PDF not retrieved; try media.distributordatasolutions.com siemenscomplete documents or usa.siemens.com/speedfax. Docs: SPEEDFAX Section 12 p.12-32
LEAD-0067	1	**Current Eaton Volume 4 Tab 2 (CA08100005E) terminal and accessory tables** — eaton.com blocked from container. Needed to confirm newer interphase barrier numbering (IPB2 vs IPB3), J-frame shield line/load, TA350K 350 vs 400 A, 3T225FD and 3TA150FB, K-frame keeper nut pack size, and status/supersessions. Docs: CA08100005E
LEAD-0068	1	**Square D PowerPact M/P/R catalog lug tables** — Need OEM tables for AL800M23K, AL800P6K, AL800P7K, AL1200P25K, CU800M..., R-frame lugs; only tapped versions (…TK) found in Digest. Docs: 0612CT0101
LEAD-0081	1	**FPE OEM panelboard catalog / renewal parts list** — Find original Federal Pacific (or American Circuit Breaker / Federal Pacific Equipment) panelboard catalog giving CDP/BDP/NDP/FDP/NA1B/NH1B/NBLP definitions and the KCDP/KBDP/KFDP/KQB kit tables with breaker compatibility, dimensions and bus details. Circuit Breaker Sales (Matthews NC, 704-882-1875) holds FPE technical documents per fpeparts.com.
LEAD-0082	1	**Confirm KBDP3C frame and KCDP5C/KBDP5C ratings** — Numbering pattern (1=NE/NEF, 2=NEJ, 3=NFJ, 4=NJL, 5=NM) is inferred; Superbreakers gives 225 A for KCDP5C (NM/NN) which looks wrong.
LEAD-0085	1	**Eaton CH/BR retrofit kits current status** — Verify whether RACH*/RBCH*/RCCH*/RDCH*/RABR*/RBBR*/RCBR*/RDBR*/REBR*/RAABR* kit numbers are still orderable (Lincoln Flex Center 800-330-6479) and find the original Eaton publication number/date; look for 480Y/277 V retrofit (PRL-based) offerings and Square D/Siemens equivalents.
LEAD-0099	1	**Siemens instruction-sheet bucket (remaining sheets)** — Public S3 bucket dcc-data-extract 'Compas/Instruction Sheet Quick Guide' holds ~1,290 Siemens SIE_IS_* sheets; this batch processed panelboard/switchboard kit sheets only. Not yet processed: MCCB terminal/lug kits (TA*/TC* lug sheets, e.g. SIE_IS_JD-LD_Distribution-Lug, SIE_IS_FD_Compression-Lug), Vacu-Break/HCP switch kits, PowerMod/meter-stack kits (reppartsspdfax: GMBC1/2, MMCVR1, MMBMT1, MMSCK1, MMPK11/13), MG1/SMND/NG1D image sheets, F672/F6162D fusible kits.
