SIEMENS
LPDC01
Instructions for Panelboard Directory Card for use in enclosures and other applications

KIT INCLUDES: Qty. (10) White Card-stock Panelboard Directory Cards (p/n: 12-1110-01)

1. **Lock off ALL power supplying this equipment before working on it.**

2. Unlock and open the Trim Door, exposing the back of the door.

3. Locate an area on the back of the door similar to shown in Image 1. If place to store the directory card is NOT present, order Kit LPDC02 (for Vinyl Pouch). If storage for this card is visible and in usable condition, proceed to the next step.

4. The new directory card will need to be properly filled out. At this time, review one of the new directory cards. The new cards are 5” wide by 11” tall, perforated in the middle, with NEMA numbering on one side and Vertical/ Custom numbering on the other side. Please use the preferred method for your application.

5. If old/damaged card exists, copy the information from it, making adjustments as needed. Otherwise, fill the directory card to match the application/breakers based on panelboard contents.

6. Fold the new directory card in half at the perforated line and slide it into the storage location, ensuring the pertinent information shows through the clear vinyl pouch.

7. **Before energizing the panel**, ensure that any barriers and fillers are in place and secure, that the trim is properly in place, and the door is closed and locked.
